## Ting Owned Networks Progress

| Town             | Potential SAs  | SAs Completed <sup>1</sup> | % Completed |
|------------------|----------------|----------------------------|-------------|
| Raleigh Region   | 90,000         | 36,245                     | 40%         |
| Charlottesville  | 24,000         | 18,219                     | 76%         |
| Sandpoint Region | 8,000          | 6,480                      | 81%         |
| Denver Region    | 43,000         | 27,296                     | 63%         |
| Western Slope    | 38,500         | 6,400                      | 17%         |
| Culver City      | 21,000         | 11,314                     | 54%         |
| Alexandria       | 93,500         | 3,353                      | 4%          |
| <b>Total</b>     | <b>318,000</b> | <b>109,307</b>             | <b>34%</b>  |

## Ting Leased Networks Progress<sup>2</sup>

| Town             | Potential SAs  | SAs Completed <sup>1</sup> | % Completed |
|------------------|----------------|----------------------------|-------------|
| Westminster      | 6,514          | 6,514                      | 100%        |
| Fullerton        | 53,500         | 4,822                      | 9%          |
| Solana Beach     | 7,500          | 4,810                      | 64%         |
| Encinitas        | 26,000         | 4,401                      | 17%         |
| Colorado Springs | 222,500        | 0                          | 0%          |
| Carlsbad         | 52,000         | 526                        | 1%          |
| <b>Total</b>     | <b>368,000</b> | <b>21,073</b>              | <b>6%</b>   |

SA = Serviceable Address

1. Defined as premises to which Ting infrastructure or Ting's partner infrastructure has the capability to provide a customer connection in a service area.
2. On leased networks, Ting may not be the sole Internet service provider (ISP), or may have a head start before other providers or services. As a result, we do not expect long-term subscriber penetration to be as high as on our owned networks, where we are the sole ISP.
